BRIGHTGROVE

Join us as a **DevOps Consultant** and be at the forefront of multi-cloud technologies. You will spearhead the creation of our multi-regional DevOps teams and collaborate with a talented group of professionals across various projects.

This is an exciting opportunity to contribute to a range of initiatives, providing innovative and practical advice & tangible solutions to business and technology leaders. You will be involved in developing new ideas, solving their toughest challenges, and preparing them for tomorrow's opportunities.

As a remote-first company, we welcome candidates from all over the world to join our team. Enjoy the benefits of working on long-term and stable projects, with experienced colleagues, and participate in smooth and respectful interviews.

ABOUT BRIGHTGROVE

At Brightgrove, we don't just say "we are different"—we live it.

With over a decade of experience in the software development landscape, we've grown from a small team of three engineers to a bustling hub of over 600 talented individuals spread across the globe. Our commitment to creating conditions for growth and development has earned us the trust of 290+ clients worldwide, including renowned companies like Pluto.tv, HRS, and Logitech.

PROJECT DETAILS

You will be working on multiple projects, supporting different teams from a DevOps engineering perspective. This involves reliable deployment automation, performance tuning, scalability, and security focus in the design of Infrastructure as Code (IaC).

The tech stack includes Terraform, AWS, GCP, Azure, Kubernetes, Docker, Postgres, Couchbase, and Azure SQL. You will also work with CICD tools like Team City, BitBucket, Snyk, and others for Android/iOS/Java/Python/.NET

RESPONSIBILITIES

- Work as part of a dynamic development team at the forefront of multi-cloud technology.
- Contribute to the ongoing development of our infrastructure as code.
- Design and implement reliable deployment automation, performance tuning, scalability, and security.
- Collaborate with different teams to support them from a DevOps engineering perspective.

SKILLS

- Minimum of 3 years' experience in DevOps.
- Minimum of 2 years' experience with Terraform.
- Proficiency in one of the multi-cloud technologies: AWS, GCP, or Azure.
- Experience with PaaS and containerized applications (Kubernetes, Docker).
- Experience with CICD tools like Team City, BitBucket, Snyk, and others for Android/iOS/Java/Python/.NET…
- Excellent verbal and oral communication skills in English.

BRIGHTGROVE BENEFITS

ENVIRONMENT
We value honesty, full transparency, and minimal bureaucracy in our work environment.

WORK SCHEDULE
Your work hours are flexible. Agree on your schedule with the client and manager at the start or adjust as needed as you go along. You have the option to work remotely or from our comfortable locations in Kyiv, Kharkiv, Lviv, Bucharest and Wrocław.

EXTRA INCOME
Feel the desire to earn more or explore other technologies? You have the opportunity to take on short-term part-time assignments whenever you wish.

PAID TIME OFF
The number of days off you get depends on the project, and our caring HR team will make sure you don't forget to use them.

HEALTH INSURANCE
Time off due to health issues is agreed with your manager as needed. Medical insurance is available after the probation period is completed.

SPECIAL BONUSES
We love to share your joy. If you're getting married or having a newborn child, let us know, and we'll congratulate you with bonus.

MEETUPS
Share your knowledge at our internal meetups. We'll help with presentation preparation or publishing an article, and reward you with cool corporate merchandise.

REFERRAL PROGRAMS
We offer bonuses for attracting friends, ex-colleagues, and potential clients to the company.

PERSONAL DEVELOPMENT
Attend conferences, courses, workshops, or get certified—we offer full or partial compensation for your personal development
